XBOX CONTROLLER

Xbox Wireless Controller · Absolute Controller layout form · fill it in, drop it on the website, get your layout

MAKE YOUR OWN LAYOUT

1. **Fill in page 2**
   Every box is a dropdown. Pick an action for each button on each layer, or type a spell, macro or item:
   Spell: Fireball · Macro: My Macro · Item: Hearthstone · leave a box empty (or pick Unbound) for nothing.

2. **Save it**
   Open this PDF in Acrobat Reader, Chrome, Edge or Preview on a Mac, fill it in, then save (Ctrl+S / Cmd+S).
   The blank version starts empty.

3. **Drop it on the website**
   Go to absolutegaming.store/controller.html and drop the PDF on the layout builder.
   It is read in your browser and never uploaded. Check the review table and fix anything it couldn't match.

4. **Download Imported.lua**
   Pick Retail or WoW Forever and Windows or Mac. The page shows the exact folder:
   ...\World of Warcraft_retail_ (or _forever_)\Interface\AddOns\AbsoluteController (replace the Imported.lua there)

5. **Log in**
   At your next login (or /reload), Absolute Controller adds your layout and selects it.
   Open the map with /actrl to check it, then press APPLY TO GAME. Or paste the layout string with /actrl import.

HOW THE LAYERS WORK

- Hold LT and the face buttons, D-pad, shoulders and stick clicks become a second set of buttons; hold RT for a third, both for a fourth.
- In the game, LT acts as Shift and RT as Ctrl, so each layer is its own set of key bindings. Menu works as Escape.
- The triggers and Menu are not on the form: they are the layer buttons and the menu button.
- The addon checks every action against your game when you apply. Anything a game doesn't have is skipped and listed in chat.
- Your old gamepad bindings are backed up the first time you apply; PUT MY OLD BINDINGS BACK restores them.
